

FOONS PHOTOGRAPHY LESSONS

CLASS 1 - BASIC TECHNIQUES

There are a handful of basic problems most people make during their picture taking. Be prepared to prevent these basic faults and your pictures will improve immediately.

Topics Include:

- Blurry Images
- Exposure Errors
- Lens Flare
- Fill Flash

CLASS 2 - KNOW YOUR CAMERA

Today's modern camera gear can be very complex. Having control of your gear will give you the power to make aesthetic decisions. We will explain the important things to know, to give you control.

Topics Include:

- Understanding Shutterspeeds & Apertures
- Exposure Modes
- Depth of Field
- Basic Flash

CLASS 3 - BE CREATIVE

Once you know how to operate your camera, the next step is to control your image. A great image must contain a range of basic elements. Learn tips that will help you create much stronger images by the use of selective focus, creative cropping, subject placement, and use of color.

Topics Include:

- Rules of Composition
- Lens Types
- Lighting Principles
- Use of Color

CLASS 4 - FLASH & LIGHTING TECHNIQUES

The most basic element of a good photo is light. We will show you how to use available light and flash to correctly light your subject whether indoors or outdoors. By understanding the principles of lighting you will learn how to make better use of the light in a wide variety of situations.

Topics Include:

- Flash in Camera
- External Flash
- Balancing Flash & Available Light
- Working with Natural Light
